PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**Dear editors and colleagues, I looked carefully at the text. My opinion: 1. The text is of excellent quality; 2. The text is exploratory. Praise for the author (authors). However, a very small, very small revision is needed (correct technical errors in the text and pay attention to style and grammar - marked in red). As far as I noticed, not all references (shown in the literature) are listed in the text. It would be nice for the author to make references list at least five more papers from Scopus and WoS (posted on a similar topic).**	**Yes, thank you for the reviewers for giving his/her valuable time for the correction of my research paper. Typographical error is corrected All references were included in the text Five more references were also included**
