PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**The indicated manuscript corresponds to a bibliographic review, in which the authors, based on an extensive analysis of references worldwide, which includes studies in humans and animals (85 references), refer to the behaviour of the immune system and its impact on prevention and support in the expression of covid-19.** **It is an excellent work that scientifically reveals the role that nutrition plays in the better functioning of the immune system; especially it refers to the protective role of vitamin D.** **Congratulate the authors for the great scientific contribution of information and dissemination of the complex actions of the immune system in genetic and environmental matters.** **Hope that this manuscript will be of great help in preventing and combating this pandemic and possible future pandemics.**	Some references have been added to enrich this work. Thanks for the positive appraisal.
Minor REVISION comments		
Optional/General comments	I recommend its rapid approval of publication, for dissemination and knowledge of the scientific community	

PART 2:
