General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty'**, provided the manuscript is scientifically robust and technically sound.
To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(http://www.sciencedomain.org/journal/10/editorial-policy)

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**The introduction reflects that the bibliographic review is abundant and updated but, there are approximately 28 authors of the review that do not appear in the list of references, as well as, there are 10 authors listed in references and are not reflected in the text of the article. This can be arranged with a checklist, recommending that you adhere to the reference system, which was indicated in the instructions for authors.**	I have revised the Bibliographic according to the observation given.
Minor REVISION comments	For methodological reasons, you should remove the references from the conclusions.	The methodological was removed from the conclusions
Optional/General comments	The work is very important in Basic Research, with valuable contributions, where it is considered that there is little substantiated information.	

PART 2:

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Are there ethical issues in this manuscript? Yes	*(If yes, Kindly please write down the ethical issues here in details)* Guide to Animal Welfare Regulations (USDA 1985). I conduct the study Avoiding or minimizing of discomfort, distress, and pain on capture and releasing animals.
