PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	It would be very useful to add in the "Introduction" section the purpose, objectives and hypothesis of the research. The authors must present the research hypotheses in the methodology section. I recommend the authors to present the novelty of this research compared to previous research. We consider that the paper should include 4 sections: Introduction, Literature review, Method and results and Conclusions. The paper must also contain an econometric dimension. The conclusions need to be developed. The list of references is too short. The article must be completely redone. Authors should cite papers published in journals indexed in Web of Science	Correction done Done Accordingly
