PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**The research is very simple, evaluating only four doses of N in the variables of growth and production of beans, with only three replications. No information was provided on the properties of the cultivated soil, if there was precipitation and irrigation, if there were crop treatments, etc. Many details were not informed. The results were only presented, with some comparison with other research, but without discussion.**	Corrected and revised
Minor REVISION comments	Check details highlighted in the text. The writing can be greatly improved to increase the quality of the manuscript.	Noted
Optional/General comments	Authors should read and reread the manuscript to try to improve their writing, many simple details have been left unattended in quality.	

PART 2:

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Are there ethical issues in this manuscript?	*(If yes, Kindly please write down the ethical issues here in details)*
