PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**English editing by native English editing service**	English has been edited
Minor REVISION comments	1-The manuscript is full of typos and punctuation errors; therefore, authors are suggested to get this manuscript's language by native English speaker. 2- Please see the comments in track change in word file, authors will find some minor comments to improve. 3-The manuscript is lack of consistency, acronym such as Cu, Zn etc. used at first appearance in the bracket with full form should be appear as abbreviated form only if used next time. 4-The results presented this manuscript indicate a decline pattern in different elements and heavy metals as the depth increase. I would love to see an elaborated explanation behind this trend with some recent reference. 5- There is scope to improve figure quality.	Corrected Done revision Correction made Done
Optional/General comments
