SDI Review Form 1.6

PART 1: Review Comments

<table>
<tr><th></th><th>Reviewer's comment</th><th>Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</th></tr>
<tr><td>Compulsory REVISION comments</td><td>

1. (1.18±0.83 vs 0.75±0.60 cm), 0.5-2.5, Leave space between signs and number i.e. 0.75 ± 0.60. do this throughout the paper.
2. Revise and Merge some paragraph in page 2
3. Move the highlighted text in *section 3* (Results). Move it to *Section 4* i.e. Discussion
4. Some part of text in section 4 (Discussion) shall be move to *Conclusion* section, and some part of it shall be move *to Introduction* section.
5. The references referred to in the main text of the paper should be written in the unified form, such as [1], [2], [3] and so on.
6. The numbering of the reference should follow the sequence at which the reference is cited in the text, strictly adhered to the format [ ],

</td><td>The spacing between the figures have been adjusted accordingly. Punctuation errors have been corrected</td></tr>
<tr><td>Minor REVISION comments</td><td>

1. **2.MATERIALS and METHODS, 1.INTRODUCTION**: Heading of the paper should be written in the unified form Leave space before writing a text in the section and subsection i.e. **1. INTRODUCTION**
2. Key words, *Conclusion*: the Bold shall be consistent. Remove full stop in the end of the keywords. End all the sentences with the full stop.
3. Capitalize each word in all headings *sections* and *subsections* as well as in *Tables* captions.
4. it is advisable that the author represent highlighted text in page 2 in the tabular form as demonstrated below for clarity. name it

***Table 1**. The landmarks of various measurements and their description*

S/n	Abbreviation	Meaning	Description
1.	ALL	Absolute leg length,	**????** *please create this row*
2.	RLL	Real lower limb length	distance between the anterior superior iliac spine and the epicentre of the medial malleolus.
3.			

5. **B Igbo (18)** in table 2 has no headings.
6. Please check the *table 1 & 2* again and revise for clarity. It seems the values overlaps. And ± are missing in some places.
7. It might be interesting to create a separate table for each of ethnic distribution of Lower limb somatometry values. *i.e.* Table 1. Yoruba: ethnic distribution of Lower limb somatometry values; Table 2:Igbo: ethnic distribution of Lower limb somatometry values; and so on…
8. Justify the highlighted text in **Ethical Approval .**

</td><td>

There is no need to create the suggested table as the information being passed across in the materials and method section is clear in the present format.

The headings for the Igbo data have been added.

The results for the three ethnic groups are best presented as a single table. Multiple tables may make the paper rather clumsy.

</td></tr>
<tr><td>Optional/General comments</td><td>

1. On creating the table for the following: ***Yoruba, Igbo, and Edo***, . **i**t might be interesting to discuss their results separately in section 4..
2. Capitalize each word in the reference text, use punctuation (.) after initial and separate two or more initials in the references with the punctuation.

</td><td></td></tr>
</table>

PART 2:

	Reviewer's comment	Author's comment *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Are there ethical issues in this manuscript?	*(If yes, Kindly please write down the ethical issues here in details)*
