

Editor's Comment:

"MEDICAL CHOICES FOR A WEALTHY NATION - A MULTINOMIAL LOGISTIC MODEL is an interesting article, despite the very pertinent repairs issued by the second reviewer and which the author has only partially followed up on. There are, however, corrections that the author (s) have yet to make. They have to do with the fact that a period or paragraph should not start with a []. For example,

[5] have found that in Canada, the level ...

must be replaced, for instance, by

In [5] the authors have found that in Canada, the level ...

Then the paper can be published in AJPAS."
