

**Editor's Comment:**

The study is a very relevant topic in pediatrics and it was properly carried out. However I made the following observations:

1. The title of the manuscript is not consistent with the actual study done. Authors should use more appropriate title.
2. There is no institutional ethical approval for the study.
3. Some of the grammar used need to be refined.

I have attached a copy of the manuscript with my corrections and comments.

**Editor's Details:**

**Dr. Ejeliogu, Emeka Uba**
