

Editor's Comment:

I am addressing you in connection with the new version of the manuscript "Analysis of Marketing Margins and Efficiency of Cassava-based product in Cross River Central Agricultural Zone, Nigeria" that you sent to us.

First of all, I want to thank you for the changes you made in the manuscript and your response to the comments from the three evaluators, who significantly improved the work. Both the three evaluators, like me, we consider: a) in general, a very good and attractive subject and appropriately written paper, b) the authors were clear in their research plan, c) the abstract is clear and provides clear introduction to the parts of the paper, d) the Introduction and the literature review are very good and streamlined, e) the literature is satisfactory to tie the title, the abstract and the literature itself to the methodology and later on to the discussions, f) the methodology is appropriate, g) the results/treatment of the subject are clear, well presented appropriate to support the discussion about the objectives of the paper, and h) the conclusion and recommendations are adequate.

Based on the aforementioned, I am pleased to inform you that it has been accepted for publication.
