

Editor's Comment:

The paper, Influence of growing media on growth and yield of Marigold (*Tagetes Erecta* (L.)) under Protected Environment is well researched experimental work that has novel science and result that contributes to the field of sustainable agriculture of Marigold. However, there may need to indicate what ETo, ETc and other symbols used in the paper means for non-professional readers. The author needs to follow the journal style of in-text citation and referencing too.

The paper can be published after the minor corrections.
