

**Editor's Comment:**

I have evaluated the manuscript,,the reviewer comments and suggestions have been done....but i find minor corrections to be done in manuscript:

1) opg showing root length measurement of right canine when only incisors are included in the study. the measurement of root length can be depicted on either lateral or central incisor.

2) In references, other journals cited are not in vancouver style:

ORIGINAL:

MODIFIED

Yun HJ, Jeong JS, Pang NS, Kwon IK, Jung BY. Radiographic assessment of clinical root-crown ratios of permanent teeth in a healthy Korean population. J Adv Prosthodont. 2014 Jun;6(3):171-6.

This should be done for all the cited articles in references.

3) In references, articles no 11, 13 and 17 cited page numbers starting and ending to be included.
