

Editor's Comment:

Taking into account the results of the manuscript evaluation process and two generally positive review reports and authors' feedback, I can state that the manuscript 2021/JSRR/68883 currently entitled "PROBIOTICS: FOODSUPPLEMENT FOR HUMAN CONSUMPTION" could be publish in Journal of Scientific Research and Reports. However a few corrections is still needed.

1. page 1 – title : should be: Food supplement;
2. all names of bacteria should be in italics;
3. authors should check the manuscript carefully - in many places spaces between words are missing, e.g. acdHCl; theparacellular; onHelicobacter; forprobiotic; theprevention; TheInternational ...
4. the entire text should be consistently justified,
5. page 5 – what means xylosegosaccharides?
6. page 8 – should be: India,
7. page 8 – should be: shelf life or shelf-life.
