

Editor's Comment:

I think that the author has responded to the recommendations of the reviewers and made revisions accordingly, the paper can be accepted. However, I recommend either decrease the size of the tables or remove them to the appendix. They are too big to be placed in the text. Also, they must be referred in the Results section, not Methods or Discussion. Currently, some of them are in methods section, while others are in discussion section, which is wrong.
