

**Editor's Comment:**

I am sending my decision about the manuscript Title: Handline Capture Device Efficiency in Rural Kayubulan Subdistrict Batudaa Gorontalo Province Indonesia.

Those are my relevant observations:

The authors did not make the recommendations suggested by the editor 2 which would were necessary to improve the manuscript quality. On the other hand, the manuscript did not follow the instructions of authors given by the journal; there is not subtitle which makes reading difficult The results and discussion are duplicated. Same that in the version 3.

My decision is: Rejected.
