EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<ol style="list-style-type: none">1. With reference to the article entitled "Effect of companion and family on mental health of geriatric patients in the cities of Tabriz and Urmia (Iran) - An Ecological Study". I send the following comments. The subject is interesting because of the following aspects:2. There is an increase in the population of older adults in the world.3. There are no social programs that are sufficient for your attention.4. There is a lack of information on how these population groups live5. The comments of the reviewers considered them appropriate, although they were not fully addressed by the authors. It can be seen in the corrected article, that except for the title, only the minor aspects were corrected. There are also some errors that are important to correct, for example; On the third page, the first paragraph says "The naturalistic concept of mental health was ignored by Aristotle in the Middle Ages", possibly the authors wanted to say "The naturalistic concept of mental health of Aristotle was ignored in the Middle Ages."	<p>Dear Editor : Thanks for your scientific guidance: We have devoted a lot of time to research and write this article. Meanwhile, the recommended items on the part of the professors are also considered and applied.</p>
