PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	The Author mentioned the Dinic and Ford Fulkerson classes of algorithms. I suggest they do a comparison on the complexity of some algorithms of each class and conclude on which ones perform better on which type of graphs (dense or sparse). For instance, they could compare Goldberg and Tarjan vs Galil algorithms	Thank you very much
Optional/General comments	Typos errors: Page 8 Assuming S repsresnets the set Page 30 Conclusion : transformation methods used in a flow network as wel as the decomposition technique	Please refer to the attached highlighted manuscript. (It is fixed). Thank you very much
