EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<ol style="list-style-type: none">1. Always tables go at the end, after discussion,2. I agreed that need a correlation with morbidity. After could be accepted	<p>The comments and feedback were addressed This is to inform you that the study is linked only with the prevalence and associated factors for completion of continuum of care for maternal services. it has observed only the status of completion of three indicators of safe motherhood program i.e Antenatal Care, Delivery and Post-natal care thus, it is not linked with the morbidity status. well will look forward to any feedback and suggestions whenever and wherever.</p>
