PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The authors present an interesting investigation that describes the echocardiographic alterations detected in patients with type 2 diabetes mellitus.	
Minor REVISION comments	<p>I propose that the authors make various changes and additions to the document, in order to make the work more attractive.</p> <p>I suggest that the type of physical examination performed on patients and what anthropometric measures were considered be specified in the study design.</p> <p>On the other hand in the results it would be relevant to present the data of the ages, anthropometric measurements, blood cell count, etc. I recommend including the largest amount of data available and establishing whether they had any relationship with the echocardiographic changes detected.</p> <p>It is necessary that in Fig. 1 mention be made of the group to which each bar corresponds. Define in the text the abbreviations used.</p> <p>Comment on the Figures and Table in the Results.</p> <p>Expand the Discussion, the first half of it, is a description of results.</p>	Possible corrections have done .
