SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>This is an interesting article. However, the authors need to clarify the contribution of the study.</p> <p>Although, here I have mentioned some comments that may helpful for the further improvement in the paper. Please note that I don't feel qualified to judge about the English language and style, and this can be a issue to deal with as well.</p> <p>The story is not clear; because the grammatical errors are prevalent and cause the reader to pause for understanding. In the introduction, you should clarify the contributions of the paper which are not elaborated well in the current paper. You can talk about the following contributions: What insights can you provide based on your finding? Do they push forward our understanding? What should we do with your research? Do you have any suggestions to improve the current regulation or practice? Adding the above discussion and extend your literature review may help you make more contributions and position your contributions better.</p> <p>The paper seems to claim causality, the authors did not mention R^2 that how do we know variation between dependent variable and independent variables! Second, Authors should add more variables including control variables. Third, there is potential endogeneity issue and its remedies sufficiently. See Li 2016, Endogeneity in CEO power: A survey and experiment, Investment Analysts Journal, 45 (3): 149-162 for a summary of methods to deal with the endogeneity problem. No need to use all these methods but at least discuss them in your scenario.</p>	
Minor REVISION comments		
Optional/General comments	<p>Additionally, you should refer to more recent development references in this area. For instance,</p> <p>A meta-analysis of the relationship between companies' greenhouse gas emissions and financial performance.</p> <p>The Effect of Carbon Emission Disclosure on Firm Value: Environmental Performance and Industrial Type.</p> <p>Financial Attributes, Environmental Performance, and Environmental Disclosure in China.</p>
