

SDI Review Form 1.6

Journal Name:	Asian Journal of Fisheries and Aquatic Research
Manuscript Number:	Ms_AJFAR_52176
Title of the Manuscript:	Stock Estimates Of White Pomfret (<i>Pampus argenteus</i>) Based On Length And Weight Data In Pangandaran Waters
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The overall writing is poor, although the data are enough to support an article. The authors are therefore recommended to obtain editing service from a professional company or a native English speaker.	
Minor REVISION comments	<ol style="list-style-type: none"> 1. The authors state different experiment periods in Abstract/Results (Nov 2018-Jan 2019) and Materials and Methods (Nov 2018-Aug 2019). Please make sure to keep a consistent description through the main text. 2. Please change the subtitle of 3.1., since the present one is different from the content under this section. 3. In figures 2 and 4, the Y axes are data of fish number rather than frequency. 4. In some figures and tables, too many fractions are presented with commas instead of decimal points. 5. In figure 4c, the X-axis should be presented in the same scale as others in Fig. 4. 6. In Fig. 6, the curve was constructed from many data of other researchers (please see the data in Fig. 3 and Table 4). Hence, please remove "November 2018-January 2019" from the legend. If possible, please provide more descriptions since the curve was deduced. 	
Optional/General comments	The authors are recommended to read several AJFAR papers so as to polish their manuscript for a better format.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
