<b>Compulsory</b> REVISION comments	<p>This paper proposes the extracting noise-free images from a bounded region with Map Using Flood Fill Algorithm, but the quality of this paper needs further improvement to be considered for publication. The detailed comments are listed as below:</p> <ul style="list-style-type: none"> <li>• The authors clearly presented the flow of the paper by organizing the content in proper way.</li> <li>• The concept/methodology proposed in this paper is straightforward, and seems didn't have much research value.</li> <li>• The problem on the extracting noise-free images have been receiving many discussion in recent years. What is the specialty of this paper raised by the authors?</li> <li>• The authors should highlight the research gap from the previous study. Some comparison results are required.</li> <li>• The authors should present results by taking different inputs and they have to tell how much efficiency they achieved compared to previous studies.</li> </ul>	
<b>Minor</b> REVISION comments	<p><b>The authors should present results by taking different inputs.</b></p>	
<b>Optional/General</b> comments	<ul style="list-style-type: none"> <li>• In my opinion, the authors should pay little more attention about literature review. They have to explain more about novelty of this paper.</li> </ul>
