PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The study addresses an important topic and relevant issues. This study can help to understand the influence of demographic factors on gestational age at the time of delivery in pregnant women from a specific population. It is important to note that there is a shortage of information and publications on the subject in Ijaw. Thus, it is possible that this study will also benefit the care of women in this population and provide planning for preventive measures.	The study addresses an important topic and relevant issues.
Minor REVISION comments	Table1: change party for parity It would be interesting for the authors to explain their hypothesis about why advanced maternal age did not conduct PTB in this study	
Optional/General comments
