SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	We have had other pandemics in past years and warnings have been issued that something very serious could happen. Were the MERS pandemic and SARS researched? The Spanish flu pandemic. Also, smallpox, cholera and syphilis? How often do these epidemics occur?	
Minor REVISION comments	<p>"Human activity generated these pandemics because we altered the ecosystem which has an importance for balancing the planet". "Climate change causes movements of the human population and other species. The second is that animal and human life is approaching every day as a result of climate emergency and therefore their viruses travel together".</p> <p>In the Review Paper, I could observe only recent years! Was the research carried out from 2003 to 2020?</p>	
Optional/General comments	<p>We cannot say that this pandemic situation was a surprise for us. Researchers all over the world have alerted us to everything that is happening.</p> <p>The WHO guidelines should be in accordance with other associations and authorities in all countries, not only restricted to airports and airlines.</p> <p>As far as I know, nations are encouraging fund researches to prevent other epidemics although it is actually difficult.</p> <p>"Nothing will return to normal again. This is a wake-up call across the planet. What we have to do now is to build the infrastructure that allows us to live in a different way. We must assume that we are in a new era. Otherwise, there will be more pandemics and natural disasters. We are facing an extinction threat." He further says: "We need a new vision, a different vision of the future, and leaders in the main countries do not have that vision. It is the new generations that can really act."</p> <p>Sociologist Jeremy Rifkin argues that we are moving towards the Third Industrial Revolution.</p> <p>Coronavirus: 'We are facing an extinction threat and people don't even know it', says sociologist Jeremy Rifkin Juan M. ZafraThe Conversation* May 14, 2020</p> <p>https://www.bbc.com/portuguese/internacional-52657148</p>
