SDI Review Form 1.6

Journal Name:	Current Journal of Applied Science and Technology
Manuscript Number:	**Ms_CJAST_53437**
Title of the Manuscript:	**Descriptive Statistics and Heritability for Agronomic Traits and Grain Micronutrient Content in Rice (Oryza sativa L.)**
Type of the Article	**Original Research Article**

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty'**, provided the manuscript is scientifically robust and technically sound.
To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline)

PART 1: Review Comments

	Reviewer's comment	Author's comment *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**The article must be accepted for publication whose title is Descriptive Statistics and Heritability for Agronomic Traits and Grain Micronutrient Content in Rice (Oryza sativa L.).** **however, it is suggested to the author if he can talk more about the magnitude of the values obtained for the coefficients of variance and consequently giving the average a good centarl quality measure of the analyzed data.**	
Minor REVISION comments	the article entitled Descriptive Statistics and Heritability for Agronomic Traits and Grain Micronutrient Content in Rice (Oryza sativa L.). It is very important to inform future research on rice genetics and improvement.	
Optional/General comments	the article entitled Descriptive Statistics and Heritability for Agronomic Traits and Grain Micronutrient Content in Rice (Oryza sativa L.). It is extremely important to guide future research with genetic improvement of this plant species, as it shows a basic statistical analysis that will be used in the statistical inference modeling when it is necessary to generalize the conclusions obtained from the populations of interest or universes studied.	

PART 2:

	Reviewer's comment	Author's comment *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Are there ethical issues in this manuscript?	*(If yes, Kindly please write down the ethical issues here in details)*
