General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/journal/30/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Abstract: Is recommended to give the number for the total participants and for both genders.</p> <p>Data collection: What were the criteria for inclusion and exclusion of respondents? What the authors understand by "standardization" of questionnaire? Validation or checking for understanding by respondents?</p> <p>Healthy and unhealthy habits and Health and Nutrition - reader strongly needs more information on these as not a standardized assessment methods / questionnaires were used?</p> <p>Statistical analysis: What software was used? Was the data checked for normal distribution as t-student test is used in data with normal distribution. What was the p value?</p> <p>Table 1: Please explain abbreviation: GLV. What is "t" test value? p value or other value? 1.69 or 1.96 are rather unusual scores for t student test? Please check.</p>	
Minor REVISION comments	<p>Introduction: It would be beneficial for the reader to indicate differences and similarities in selected eating behaviors in the studied country to western countries.</p> <p>Materials and methods: Inserting the flow chart with the study design would be recommended (e.g. see Consort diagram for guidelines).</p>	
Optional/General comments	Please check the text for typing errors (e.g. double dots).
