Minor REVISION comments		
Optional/General comments	Firstly I appreciate the author for taking the real time experimental work for growth and yield of Marigold. This experiment was conducted at Agricultural Engineering College and Research Institute, Kumulur, Trichy. As most of us know the juice obtained from the marigold leaves is used to soothe wounds, carbuncles and earache. Also marigold is also used for r the poultry industry, as the main source of pigment as a feed additive for intensifying the yellow color of egg yolks, broiler skin The author had concluded the paper use of growing media significantly increased the growth, yield and yield contributing characters in marigold under the protected environment. Plants under soil + coirpith 100% ETc had higher yield and water use efficiency
