**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>Cryptococcosis is a common opportunistic infection, caused by <i>Cryptococcus neoformans</i>, especially in patients with acquired immunodeficiency syndrome where the disease is widely disseminated and life-threatening.</p> <p>The manuscript reports a case of cryptococcal lymphadenopathy in an 18-year-old man living with HIV. According to the authors, this is the first case of cryptococcal diseases with lymph node involvement reported in Rwanda. The manuscript also reports a satisfactory outcome of the case, with improvement in the patient's signs and symptoms, after the medication was instituted, as well as the failure to observe <i>Cryptococcus</i> in biological samples.</p>	
<b>Minor</b> REVISION comments	<p>Minor corrections are needed, such as:</p> <ul style="list-style-type: none"> <li>- observe the writing of the microorganisms.</li> <li>- Figure (2) The photos could have a greater wealth of details, such as arrows to indicate the placement / distribution of microorganisms in the tissue. The low resolution of the photos does not allow observing the microorganism.</li> <li>- Table 1 could have a heading that better describes what is presented in it.</li> </ul> <p>what method was used to identify the causative species?</p>	
<b>Optional/General</b> comments
