SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The evaluated review portrays a very important issue for the area of soil science, in which the population of microorganisms is essential for soil conservation, in addition to favoring greater plant productivity. However, such a review needs to be improved in several aspects such as:</p> <ol style="list-style-type: none"> 1) Formatting: the text is outside the formatting rules. 2) The abstract needs to be improved and standardized according to the magazine's rules, in addition to the absence of keywords right after the abstract. 3) Insert the objectives of the review at the end of the introduction. 4) The review is very general, indicating only the factors that influence negatively or positively, the factors that correlate, that is, the information contained is very superficial. Therefore, I suggest that the authors go a little deeper by presenting quantitative data, whether in the body of the text and / or in figures, tables, etc. 5) The conclusions also need to be improved by relating them to the objectives. 6) Bibliographic references need to be checked and standardized. <p>obs: I made such suggestions in comments in the text itself.</p>
