**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	<p>This is a very interesting research. It reflected the current medical situation of Niger-Delta of Nigeria. The situation is much different from Chinese tertiary hospital.</p> <ol style="list-style-type: none"> <li>1. there is a decline in clinic consultations from about 2000 patients to 800 patients over the 6-year period. I wonder whether the patients do not go to the hospital if the government do not pay the bill, or the patients will go to other hospital.</li> <li>2. I do not find the data on cervical diseases. CIN or cervical cancer. How about TCT/LCT test and HPV test in Nigeria. In china, cervical diseases patients make up a large portion in the total outpatients</li> <li>3. laparoscopic surgery is the trend of the gynecology surgery. Over 90% of the surgery is performed by the laparoscopy. Maybe the government should invest more money on it , if possible</li> <li>4. MVA for abortions are usually performed in outpatients department and the patients went back home after anaesthesia. It will save healthy resource.</li> </ol>	
<b>Optional/General</b> comments		

**PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
