	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	Explain a little more the elements of the statistical analysis used such as LSD. The course of lymphocyte transformation in terms of methodology. At the level of the discussion, we note that the age, the state of pregnancy have an action on the lymphocyte transformation. It is difficult to perceive the share of HB infection in this lymphocyte transformation, even more the age groups which also show this. Recommendations are justified, especially for the continuation of the study.	
<b>Optional/General</b> comments	This is very good work which can help reduce this path of transmission through a therapeutic initiation. As a lawsuit says, remains significant
