**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>This paper will make a valuable contribution to the scientific literature but requires some careful editing and a number of statements are made that require literature citations to substantiate the comments. In a few cases, authors are cited but there is no reference in the bibliography.</p> <p>In many cases, the authors assume medical knowledge by the reader and the paper would be improved by explaining several on these terms.</p>	
<b>Minor</b> REVISION comments	<p>Careful editing is necessary.</p> <p><b>NOTE: it would be helpful if reviewers could attach a file that has the review comments inserted in the text – this is commonplace for many journals and should make the review process far more efficient and helpful for the authors.</b></p>	
<b>Optional/General</b> comments	<p>The paper seems to alternate between a “folksy” approach and a far more austere 3<sup>rd</sup> person and scientific review writing style – the latter is preferable.</p>
