PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<ol style="list-style-type: none"> 1. Significant positive correlation between RF, as well as anti CCP titer, and both HBV DNA and HCV RNA viral levels was mentioned, but this correlation was not found in "Results". 2. Patients with HBV infection were determined to be carriers of inactive HBV (level of HBV DNA below 2000 IU/mL and serum levels of ALT that remained normal). Can you comment the correlation with RF as well as anti CCT titers. 3. The authors found significant difference between the hemoglobin levels in the four groups, but the levels of hemoglobin were not found in "Results" 	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
