PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The article is interesting, it approaches several scientific aspects of the interference of lead acetate and L-citricuilline in the characterization of spermatozoids. Several grammatical aspects must be reviewed, besides the chemical quantities. Statistics should be reviewed for the fourth sampling group. There are no significant differences between the control group.	
Minor REVISION comments	A more thorough review of writing is needed.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
