SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)																
Compulsory REVISION comments	<ol style="list-style-type: none"> (1.18±0.83 vs 0.75±0.60 cm), 0.5-2.5, Leave space between signs and number i.e. 0.75 ± 0.60. do this throughout the paper. Revise and Merge some paragraph in page 2 Move the highlighted text in section 3 (Results). Move it to Section 4 i.e. Discussion Some part of text in section 4 (Discussion) shall be move to Conclusion section, and some part of it shall be move to Introduction section. The references referred to in the main text of the paper should be written in the unified form, such as [1], [2], [3] and so on. The numbering of the reference should follow the sequence at which the reference is cited in the text, strictly adhered to the format [], 																	
Minor REVISION comments	<ol style="list-style-type: none"> 2.MATERIALS and METHODS, 1.INTRODUCTION: Heading of the paper should be written in the unified form Leave space before writing a text in the section and subsection i.e. 1. INTRODUCTION Key words, Conclusion: the Bold shall be consistent. Remove full stop in the end of the keywords. End all the sentences with the full stop. Capitalize each word in all headings sections and subsections as well as in Tables captions. it is advisable that the author represent highlighted text in page 2 in the tabular form as demonstrated below for clarity. name it <i>Table 1. The landmarks of various measurements and their description</i> <table border="1" data-bbox="810 1125 1967 1276"> <thead> <tr> <th>S/n</th> <th>Abbreviation</th> <th>Meaning</th> <th>Description</th> </tr> </thead> <tbody> <tr> <td>1.</td> <td>ALL</td> <td>Absolute leg length,</td> <td>???? please create this row</td> </tr> <tr> <td>2.</td> <td>RLL</td> <td>Real lower limb length</td> <td>distance between the anterior superior iliac spine and the epicentre of the medial malleolus.</td> </tr> <tr> <td>3.</td> <td></td> <td></td> <td></td> </tr> </tbody> </table> <ol style="list-style-type: none"> B Igbo (18) in table 2 has no headings. Please check the table 1 & 2 again and revise for clarity. It seems the values overlaps. And ± are missing in some places. It might be interesting to create a separate table for each of ethnic distribution of Lower limb somatometry values. i.e. Table 1. Yoruba: ethnic distribution of Lower limb somatometry values; Table 2:Igbo: ethnic distribution of Lower limb somatometry values; and so on... Justify the highlighted text in Ethical Approval . 	S/n	Abbreviation	Meaning	Description	1.	ALL	Absolute leg length,	???? please create this row	2.	RLL	Real lower limb length	distance between the anterior superior iliac spine and the epicentre of the medial malleolus.	3.				
S/n	Abbreviation	Meaning	Description															
1.	ALL	Absolute leg length,	???? please create this row															
2.	RLL	Real lower limb length	distance between the anterior superior iliac spine and the epicentre of the medial malleolus.															
3.																		
Optional/General comments	<ol style="list-style-type: none"> On creating the table for the following: Yoruba, Igbo, and Edo, . it might be interesting to discuss their results separately in section 4.. Capitalize each word in the reference text, use punctuation (.) after initial and separate two or more initials in the references with the punctuation.
