PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<p>Dear Author, Effect the following corrections to improve on your manuscript:</p> <p>TOPIC: Pepper Veinal Mottle Virus and not Pepper Venal</p> <p>ABSTRACT (Material and Methods)</p> <p>State when the seed germinated, when inoculation was carried out, when symptoms manifested and when leaves were collected for biochemical analysis.</p> <ul style="list-style-type: none"> I suggest the use of physiological and biochemical instead of just biochemical. because the parameters used. <p>Line 29: It should be other West African countries and not others West African countries. Line 33: Of is omitted.... Symptoms expressed on the leaves of plants. Line 38: Significant losses in production not of production; and in some area and should be deleted. Line 40: Solution should be deleted.</p> <p>Line 40-41: The sentence has no link to your article (manuscript)..... existence of poor phytosanitation - as what?</p> <p>From line 40-47 should be deleted.</p> <p>Line 67: Delete the word naturally. Or restructure the sentence.</p> <ul style="list-style-type: none"> NOTE: All <i>et al</i> in the text should be italicized. <p>Line 83, 87, 90, 98: You don't begin a sentence with figures (numbers) and abbreviated words. Line 110: Inoculated with and not inoculated by PVMV. Line 126,134: Replace the word non significant with insignificant. Non significant is not scientific. In figure 2 and 3: Correct the word infested to infected. Infested is used when you are working with pest infestation and not virus infection. All infested in the text should be changed to infected. Line 137: Should be when compared to their control. Delete ones. Line 181: Chili pepper showed to be... Showed to be should be deleted. Discussion line 194: Compared to the other varieties and not the others varieties. Line 224, 230: include stress.... i.e. oxidation stress enzymes.</p> <ul style="list-style-type: none"> Begin your discussion by stating the topic of your research. Your results and discussion are not linked to the word responses which is key to your research. Responses can be positive or negative. Link increase and decrease obtained in this research to responses. 	
Optional/General comments	Thank you for your valuable research.
