PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	I will be honored to review this manuscript. I have read it. The work need major revisions in methodology. As they have applied poultry manure to enhance yield of Okra. But in my opinion poultry manure may carry lots of contaminants e.g. nitrates, POPs etc, so there should be analyses for poultry manure as well as soil and under ground waters for that area. secondly author has presented results in tables and in discussion section he has explained those results (table) in detail. If table is given then there is no need to utilize space in describing then again in discussion. so if we remove that section of discussion then we will be hardly left with few lines of discussion. Lastle, if you look at the table, the author has calculated the means of three treatments. This is no way to manipulate data.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
