PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	In your introduction, there should be review on remote sensing and GIS relating to your study. Also, at the end of your introduction, there must be problem statement leading to your study. There should be a classification process in your study since your study uses supervised classification following maximum likelihood method. Re-produce some of your figures that are not properly into the normal position as some overlapped on text. Include a short procedure/process of classification in your study. Under your methodology, you mention that accuracy assessment was carried out but the section of the accuracy assessment did not reflect in the study. in your LULCC map, each of your map suppose to contain 'Legend' and not only one at the end	
Minor REVISION comments	See the complete manuscript	
Optional/General comments	Author should go through the manuscript and check for necessary correction to be made.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
