SDI Review Form 1.6

PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|--|--|
| Compulsory REVISION comments | <p>There is no method in the text but only in abstract. The authors need to be firm whether they want to make it as systematic review or only narrative review. No method needed if they want to make a narrative review.</p> <p>Section 1, you need to add more about dynamic role and functions of nurses.</p> <p>Section 4. "Indeed there is an ethical concern about inadequate protection during the battle against COVID-19 that raised a question primarily on working hours." → This is not an ethical concern, this is the human right issue. There is no connection between sentences. I think some concerns should be highlighted like ratio of nurses and physician, how long the interaction time of nurses and patients and others concern related to specific-nurses-issues.</p> <p>Section 5.1. You need to explain more how you can do comprehensive care through telemedicine.</p> <p>Section 5.2. Add more data about how has the shift changed.</p> <p>Section 6. "A survey among nurses working in ICU demonstrated the underlying causes of psychosomatic illness such as less appetite or improper digestion of food, sleeping difficulties, crying spells, and even suicidal intention." → What do you want to say? There are psychosomatic illnesses suffered by nurses in this pandemic? Mention the number, how much was the increase or any OR?</p> <p>Section 7 Give some examples of the researches.</p> | |
| Minor REVISION comments | <p>Section 1 may be combined with section 2. Section 3 may be omitted since it is not associated with what the authors want to mention.</p> <p>Section 5 you need to add more about what you want to discuss as you showed in 5.1 and so on</p> | |
| Optional/General comments | | |

PART 2:

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
