PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	In the abstract section, the methodology part should be slightly elaborated with necessary information. Authors should use specific keywords, like- Vitamin D, Chronic conditions, Prescribing trends, --- Introduction should clearly address: a sound background, current status of the use of this vitamin and complications related to its therapy, the aim and objectives of this study. Only a single sentence is not enough to be a separate paragraph.	
Minor REVISION comments	The authors can mention the Ethical Approval number in the methodology section (if any). From both tables, the authors can discard the numbers. Please keep only the percentage value. The use of Vitamin D supplement in hypertensive patients should be written as Vitamin D supplement in hypertensive patients . Similarly- Vitamin D supplement in patients with other cardiovascular diseases, Vitamin D supplement in diabetic patients, Vitamin D supplement in patient suffered from osteoporosis, Vitamin D supplement in patient suffered from neurological or psychiatric disorders, Vitamin D supplement in patient suffered from thyroid diseases Generally, a heading should not contain full stop. Same thing happens in case of titles of the tables.	
Optional/General comments	The authors can also include a separate short paragraph for this vitamin inspect of the current pandemic Covid-19. This vitamin has been frequently used with vitamin C. They can also include a future direction upon going through their findings in their study.
