

**Editor's Comment:**

Generally, the work is very good. The design, data collection, processing is of high standards. There are only a few places where corrections are needed. Areas such as providing the full names of the scientific names.

Results and discussion is good.

Conclusion is also good.

Overall, it is a good manuscript.

I have also highlighted and/or corrected certain portions for your attention.

Kindly accept the manuscript after corrections have been effected.
