

**Editor's Comment:**

The manuscript referenced as Ms\_AJACR\_54376 and entitled as Synthesis, Characterization, Antibacterial and Thermal Studies of Cu(II) Complex of Thiophene-2- aldehyde Semicarbazone Submitted for publication in the Asian Journal of Applied Chemistry Research, has a great biology interest particularly in the management of microbial infections.

Nevertheless some corrections should be added. The name of compound in diagram 1 thiophene-2-carbaldehyde instead of thiophene-2-aldehyde.

The same remark in section 2.3 and across the manuscript.

I see that the author accepted and corrected all the reported remarks by reviewers. After acceptance of the last correction that I propose, I will agree publication of this article in the Asian Journal of Applied Chemistry Research.
