

Editor's Comment:

The Editorial re-review of the article 2019/AJBGMB/53626 entitled "Rheology and Acceptance of Pap (*Zea mays*) Enriched with *Jatropha Carcus* Leaves to Improve Iron Status in Children" is now completed.

The changes suggested by the reviewers are reported and I consider these changes, particularly some specific ones, constructive for this manuscript.

With these changes, the current form of the revised manuscript is now improved and I believe at present that the article has the potential to make a good contribution to research literature in the Asian Journal of Biochemistry, Genetics and Molecular Biology.

As an Editor and taking into consideration some constructive recommendations completed, together with the improved condition of the manuscript, I ACCEPT this article for publication in the Asian Journal of Biochemistry, Genetics and Molecular Biology.
