

Editor's Comment:

I have gone through the manuscript having the reference Number Ms AJEBA 67196 as well as the reviewer's comments.

My Decision: Major Revision

Comments to Authors:

1. The topic is interesting, but the text is very poorly developed.
2. Most of the sentences are incomplete and it is very hard to read in its current form. Hence, I request the authors to go for a proofreading by an English language expert.
3. The manuscript is completely unstructured. Please focus on the documentation of the review of the literature to arrive at the research gap, motivations, methodology, variable descriptions, data and major findings of the study. The linkage has to be established amongst these sections.
4. Please read a couple of sample papers to scientifically develop the context of the paper.
