

**Editor's Comment:**

Title **Effect of Diethylcarbamazine (DEC) in Relapse cases of Nephrotic Syndrome in Filarial Endemic Region: A case Series**

The title suggest an clinical trial rather than a case series.

The introduction is very extensive. The goal of the study is not written

There is no adequate description of the methodology

The results are not expressed clearly. It is hard to understand

The discussion is a results repetition.

The manuscript must be rewritten, following the case reports guidelines.

Require major corrections
