

**Editor's Comment:**

Please, ask authors to send the latest version (attached) **highlighting ALL (AND ONLY) the modified sentences**. I noticed that the authors did not objectively highlight the modified parts, but all the sections. In fact, they marked (all) the sections in which no changes were made compared to the original manuscript (ie Conclusion and Discussion). Why are these sections completely marked? I would like to receive the manuscript marked only with the modified phrases (including my comments and the reviewers' suggestions).
