

Editor's Comment:

Kindly accept my sincere apologies for the delay in replying to your e-mail. We are spending an auspicious time for the sacred days and the upcoming festive Eid "Festival of Breaking the Fast" and we have holidays extended to the next week, so please excuse me. As for the attached manuscript, I agree with Dr. Dionisio S. Bucayo regarding the experimental design is not suitable but, the addition of average as recommended by Dr. Said A. Saleh treated the mistake as possible. As well as, this problem can be largely mitigated by adding the small letters of Duncan beside all numbers lie in the tables, then, the manuscript is accepted for publication.
