

### **Editor's Comment:**

I read the two versions of the manuscript. I did not find any differences between the two ones. This manuscript needs still improvements to do before to be accepted.

Line 30: Keywords (not key),

Line 63: close the brackets,

Line 80: delete the paragraph "apparatus" like it was requested by one of the reviewers,

Lines 94 and others: Calabar (not calabar),

Line 218: to be due (delete the comma),

Lines 265-268: check the references, give the number of each one, and add the lacking references in the reference list,

Line 271: Moringa (not moringa),

Table 1: write the legend below the title of table not below the table,

Figures: delete "Keys"

My editorial decision:

The manuscript could be accepted after corrections only.
