

Editor's Comment:

Thank you very much for sending the reviewed manuscript, "**Reproductive Biology of Marine Catfish, *Arius latiscutatus* Günther, 1864 and *Arius gigas* Boulenger, 1911 from the Bays of Guinea**" for a final decision. I have gone through the revised paper and found that the authors have followed the reviewers scholastic comments/suggestions and improved the manuscript both of its presentation and quality. However, the paper still has some grammatical errors in the text and also has problems in formatting it (especially, the abstract, tables, figures and reference parts) according to the journal. The title of the paper should be changed to "**Reproductive Biology of Marine Catfish, *Arius latiscutatus* (Günther, 1864) and *Arius gigas* (Boulenger, 1911) from the Bays of Guinea**" Indeed, this is a good piece of innovative research and the authors worked hard to get the interesting findings. Therefore, **I strongly recommend the paper for publication** in the Annual Research & Review in Biology pending the minor revisions as mentioned above. Thank you once again for your continuous cooperation and the patience.
