

**Editor's Comment:**

I have gone through all the stages for evaluating the manuscript under review and my comments are as follows:

Two reviewers had reviewed the manuscript. The first reviewer found that the manuscript is well structured; research design is appropriate with adequately described methods and clearly presented results. However, as per the second reviewer's report, the manuscript's vocabulary is poor with repetitions. Both reviewers suggested minor revision.

None of the reviewers rejected the manuscript and the authors have also revised the manuscript as per the comments of the first reviewer.

However, still some modifications/corrections need to be addressed by the author/s. I hereby recommend that the manuscript "Proximate Composition, Sensory Properties and Microbial Quality of Chin-Chin Developed from Wheat and African Walnut Flour Blends for Household Food Security" be accepted for publication in European Journal of Nutrition & Food Safety after the modifications/corrections mentioned in the attached manuscript are made by the author/s.
